Supplementary Figure S1

Supplementary Figure S1. *Actin-Gfp* promoter is expressed in retrolental cells of *Arf*<sup>−/−</sup>, *Actin-Gfp* mouse. Representative photomicrographs of (A) DAPI, (B) green fluorescence, and (C) phase contrast from an *Arf*<sup>−/−</sup>, *Actin-Gfp* mouse shows cells in the retrolental mass (arrow) express the *Actin* promoter. Original magnification: 40x.
