

Supplemental Figure 4

Supplemental Figure 4. Ibuprofen preserves b-wave response in OIR/ROP; this effect is abolished by endothelial cytotoxic 15d-PGJ2. Quantified rod-cone b-wave amplitudes of scotopic ERGs from P60 room air raised control or animals subjected to OIR/ROP; experimental details are presented in Methods section and in Figure 5. Values are mean \pm SEM of 3-4 experiments per group; * $p < 0.05$ compared to room air raised controls.
