Figure S1. Angiogram images of the FAZ area at different time-points. (A) Baseline. (B) After 5 min of hyperoxia.
Figure S2. Bland–Altman plot analysis of inter-visit hyperoxia responses with regard to perfused vessel density in the (A) parafoveal, (B) perifoveal, and (C) peripapillary areas.
Figure S3. Bland–Altman plot analysis of intra-visit measurement of baseline perfused vessel density at the (A) parafoveal, (B) perifoveal, and (C) peripapillary areas.
Figure S4. Bland–Altman plot analysis of inter-visit measurement of baseline perfused vessel density at the (A) parafoveal, (B) perifoveal, and (C) peripapillary areas.
