

Legend for Supplemental Figure 1

Top Ranked proteins ($P < 0.05$ from the unadjusted analysis) in infants with clinically significant, low grade and no ROP

Distribution of select proteins in infants with clinically significant, low grade and no ROP. The *box* indicates the IQR (25th to 75th percentile), and the median and mean are indicated by the *lines* and *diamonds*, respectively. The whiskers indicate data within 1.5 times the IQR and points are data outside 1.5 times the IQR.

IQR, interquartile range; *RFU*, relative fluorescence unit,

Clin Sig = clinically significant ROP
