Supplementary Figure S1. Longitudinal changes in mean arteriolar caliber (µm), by baseline systolic blood pressure (mmHg) tertiles. 95 % Confidence Intervals are included.

Supplementary Figure S2. Longitudinal changes in mean venular caliber (µm), by baseline systolic blood pressure (mmHg) tertiles. 95 % Confidence Intervals are included.
Supplementary Figure S3. Longitudinal changes in mean arteriolar calibre (µm), by presence and absence of any diabetic retinopathy at any visit. 95 % Confidence Intervals are included.

Supplementary Figure S4. Longitudinal changes in mean venular caliber (µm), by presence and absence of any retinopathy at any visit. 95 % Confidence Intervals are included.
