**Supplementary Figure 1.** The association between the NPAs in individual subfields in 67 eyes of 67 patients with DR. The relation between the percentages of NPAs in the macular and extramacular areas of the inner (A), outer (B), or both (C) rings. The association between NPAs in the individual extramacular areas segmented by arterioles of the inner (D), outer (E), or both (F) rings.
Supplementary Figure 2. The length of large arterioles contacting the NPAs in 24 eyes of 24 patients with DR. The length of arteriolar arcades (A) or extramacular large arterioles (B) contacting individual NPAs.
