Supplementary Figure S2: Within-subject differences in reading parameters with respect to word manipulations for (A) 1st foveation / fixation duration, (B) number of 1st pass foveation / fixation durations, (C) acquisition time, and (D) reading speed (i.e. the parameters demonstrating significant interactions between word manipulation and group). Values displayed are differences in the squared values.

A. 1st Foveation / Fixation Duration

B. Number of 1st Pass Foveations / Fixation Durations

C. Acquisition Time

D. Reading Speed
