Supplement Figure 1: Corneal sub-basal nerve plexus status in DED patients. The graphs indicate CNFD (a), CNBD (b), CNFL (c), CTBD (d), CNFA (e) and CNFW (f), in control subjects (n=20) and DED patients (n=47). Bar graphs indicate Mean±SEM; CNFD – corneal nerve fibre density; CNBD – corneal nerve branch density; CNFL – corneal nerve fibre length; CTBD – corneal total branch density; CNFA – corneal nerve fiber area; CNFW – corneal nerve fiber width; DED – dry eye disease; SEM - standard error of the mean.
