Supplemental Figure 5: Visual function in Tmem135<sup>FUN025/+</sup> and Tmem135<sup>FUN025/FUN025</sup> mice.

(A) Scotopic a-wave, (B) scotopic b-wave, (C) c-wave, (D) photopic a-wave and (E) photopic b-wave ERG responses of P365 Tmem135<sup>FUN025/+</sup> and Tmem135<sup>FUN025/FUN025</sup> mice. Significant decreases were detected in the scotopic a-wave, c-wave, photopic a-wave and photopic b-wave of Tmem135<sup>FUN025/FUN025</sup> mice. No significant change in the scotopic b-wave was found. Data from n = 6 Tmem135<sup>FUN025/+</sup> and n = 4 Tmem135<sup>FUN025/FUN025</sup> mice. *p<0.05, **p<0.01 and ***p<0.001, ANOVA. All data are mean ± s.e.m.
