

SUPPLEMENTARY FIGURE S1

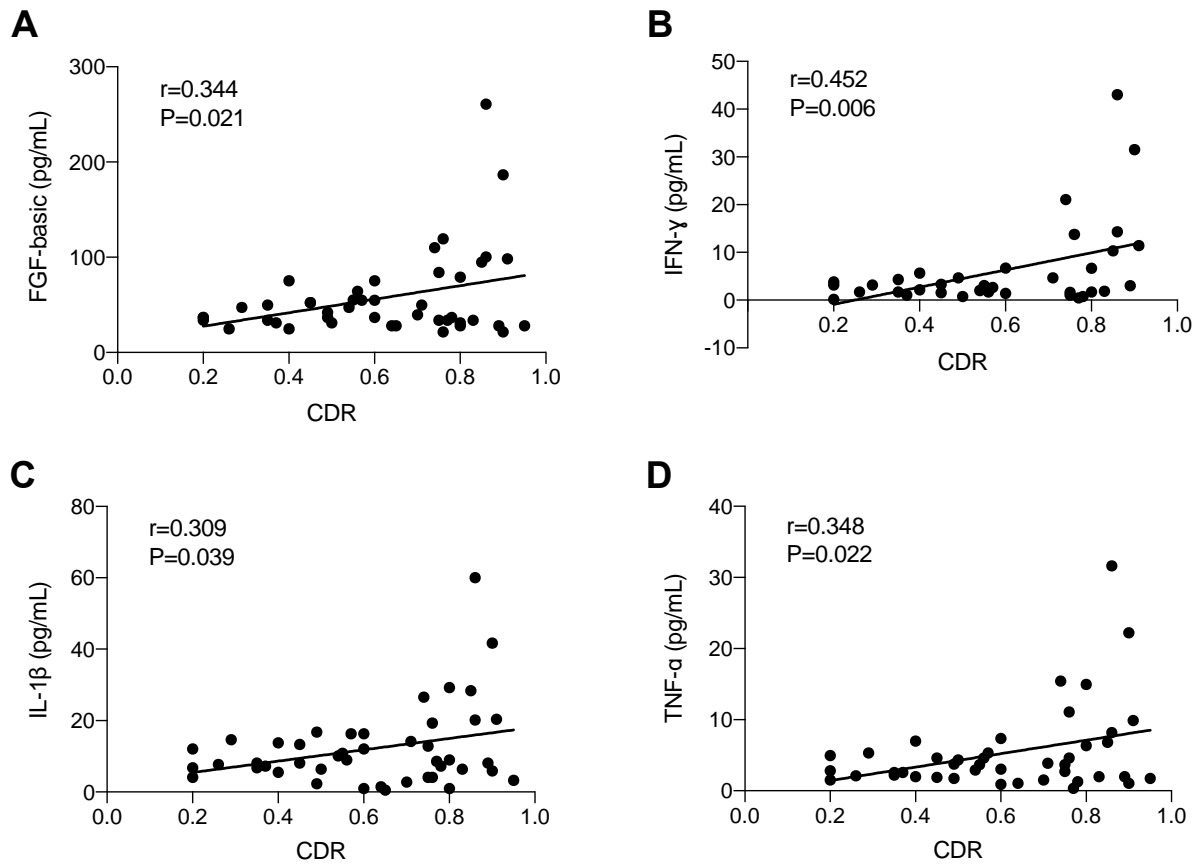

Figure S1. Scatter plots of correlations between cup-to-disk ratio (CDR) and tear cytokine concentrations in KPro eyes. Significant correlations between (A) CDR and FGF-basic (pg/mL), (B) CDR and IFN- γ , (C) CDR and IL-1 β , and (D) CDR and TNF- α are shown. Rho (r) and P -values were calculated with Spearman's rank correlation test.
