Figure S3. *Elavl2* deficiency causes the reduction of ERG response at the 9 months (P270) animals. (A, B) The amplitudes (A) and implicit times (B) of the scotopic ERG a- and b-wave elicited from *Elavl2*^fl/fl^ and *Elavl2*^Δf/Δf^ mice were recorded at P270. Results are presented as the mean ± SEM (n ≥ 8). (*P < 0.05, **P < 0.01)
