Supplementary Figure 1. Results of the simple reaction task
Each point indicates the interobserver mean. Each error bar indicates the
standard error of the mean. (a) Reaction times (RTs) in the cued and uncued
conditions, plotted as a function of cue-target onset asynchrony (CTOA). (b)
Effects of cuing on RT, as quantified by the RT in the cued condition minus the
RT in the uncued condition.
