

Figure S1. The individual data of the estimated CCW orientation shifts in Experiment 1. The symbols represent the behavioral data (red square: pedestal adapter; green cross: annulus adapter; blue circle: disk adapter, orange right-pointing triangle: noise annulus adapter; purple up-pointing triangle: noise disk adapter; gray left-pointing triangle: gray control/no adapter condition), while smooth curves and the horizontal lines the best fits of our computational model. The error bars are ± 1 standard error of mean. See caption in Figure 2 in the main manuscript for further details.
