eSupplement Figure 1A. StrabisPIX algorithm

1. Administrator creates StrabisPIX account; emails secure app link and unique access code to patient and assigns provider

2. Patient downloads app (iOS or Android) and enters assigned code

3. App guides patient through steps to obtain all 9 motility images plus head-and-shoulders image

4. Patient reviews and approves images, then submits. App encrypts all images and removes from phone

5. Physician receives secure email alert that images are ready for review: clicks link to access dashboard
