

Supplementary Figure 2

Supplementary Figure 2: Relationship between blood flow and blood pressure over time.

Vascular blood flow (MV) shown as a function of systolic blood pressure (SBP) in (A) control mice imaged over three sessions, (B) mice imaged before (blue), during (red), and after (yellow) 14 days of Ang-II infusion, and (C) mice imaged before (blue), during (red and purple), and after (yellow) 28 days of Ang-II infusion.
